

Jason Stover III | TS/SCI W/ CI-Poly CL.

Huntsville, AL 35801

(703) 994-8363

JasonStoverDeveloper@gmail.com

Cleared Software Engineer II with 8+ years of IT experience, including 4+ years specializing in software engineering for the Department of Veterans Affairs, and Defense Intelligence Agency (DIA). Skilled in Java, Python, and JavaScript, with additional expertise in relational databases (PostgreSQL, SQL Server), Agile development, and cloud technologies (AWS). Proven track record of developing new features and functionality on a \$1B, 5-year VA contract, consistently exceeding expectations with above-average performance reviews. Holder of multiple certifications, a graduate degree, and a TS/SCI clearance with CI Polygraph. Air Force veteran, recognized for dependability, adaptability, and continuous self-improvement through advanced technical training.

|--|---|
| • Java, Python, JavaScript, SQL, HTML5, CSS3, JSON | • Artificial Intelligence (AI), Machine Learning (ML), React, Node.js |
| • Spring Boot, RESTful APIs, REST/OpenAPI | • Amazon Web Services (AWS): Lambda, API Gateway, S3 |
| • Docker, Oracle WebLogic Server | • IntelliJ IDEA, Visual Studio, Jira |
| • Git, Database Concepts, Programming & Scripting Principles | • Agile, Scrum, Sprint Planning, Problem-Solving, Critical Thinking, Adaptability |
| • UI/UX Design, Responsive Web Development, Core Computer Science Concepts | |

PROFESSIONAL EXPERIENCE

Software Developer II

SOSi, Huntsville, AL

October 2025 - Current

- Develop and maintain robust software applications to improve operational efficiency.
- Collaborate with cross-functional teams to define project requirements and deliver solutions on time.
- Develop and maintain Python-based applications supporting national security analytics and automation efforts within a TS/SCI environment at the DIA (Defense Intelligence Agency).
- Design, develop, and support RESTful APIs that enable data integration and communication between mission-critical systems.
- Build, deploy, and maintain containerized applications using Docker to improve portability, scalability, and deployment consistency.
- Collaborate with data scientists and engineers to support the integration, testing, and deployment of artificial intelligence and machine learning (AI/ML) capabilities within operational workflows.

- Troubleshoot, enhance, and optimize existing software solutions while participating in the full software development lifecycle.

Software Engineer II

BOOZ ALLEN HAMILTON, Remote

June 2022 - October 2025

- Designed and optimized API-driven microservices (Java, Spring Boot, Python) to support the Veterans Benefits Management System (VBMS), a core part of a \$1B VBA modernization program serving 4M+ U.S. veterans.
- Developed and deployed AWS-hosted serverless solutions (S3, Lambda, API Gateway) to handle high-throughput data ingestion, improving performance by 27% and reducing infrastructure costs.
- *Migrated legacy Java 8 → Java 11 codebases, modularizing components to cut build times by 40% and increasing test coverage from 65% → 95%, improving reliability in mission-critical workflows.*
- Built Swagger/OpenAPI-compliant RESTful APIs, reducing integration complexity across distributed systems and lowering dependency error rates by 30%.
- Implemented pyramiding logic optimizations for disability rating workflows, decreasing API latency by ~250ms per request.
- Enhanced UI/UX efficiency through cross-team collaboration, streamlining VBMS workflows and improving user task completion times by 15%.
- Automated regression testing pipelines using containerized environments (Docker), reducing manual testing overhead and ensuring cross-architecture compatibility.
- Mentored new engineers, conducted peer reviews, and introduced debugging best practices to improve developer velocity and code quality.
- Recognized with two consecutive above-average 4% merit increases for consistent delivery of high-impact features ahead of schedule.

Software Developer

SELF EMPLOYED/FREELANCE, Vienna, VA

October 2020 - June 2022

- Full Stack Web Developer. Utilizing Udemy, and leveraging years of professional work experience from prior Cyber Security career.
- Developed apps on GitHub to showcase skills. Created a professional portfolio demonstrating my skills, aiding in career transition

Shift Incident Manager (SIM)

RAYTHEON, Arlington, VA

October 2020 - March 2021

- Responded to over 15 cyber incidents around the USA in real time, serving as Shift Incident Manager (SIM) on cleared project for DISA. Managed, forwarded, and assigned tasks to threat hunter and threat response teams
- Coordinated inter-agency communications. Assessed incident priority based upon impact to business and escalated issues as necessary

Cyber Security Specialist

BOOZ ALLEN HAMILTON, Washington, D.C.

April 2018 - October 2020

- NIST RMF Security Control Assessor at Pentagon. Earned full accreditation for two major systems. Enabled and advocated software engineers to refactor information systems to newer versions of Microsoft Server. Directly resolving long standing critical, and high RMF vulnerabilities.
- Incident Response Lead for General Services Administration (GSA). Developed playbooks, and selected program vendors. Developed methods for responding to DDOS, malware, cyber incidents, outages, phishing, etc.

Education

UDEMY at Online

Full Stack Web Developer Certificate March 2022

UNIVERSITY OF MARYLAND GLOBAL CAMPUS at Adelphi, MD

Master of Science in Cyber Security September 2019

Certifications

- EC-Council, Certified Ethical Hacker (CEH)
- CompTIA Security + CE
- Top Secret/SCI with CI-Poly Security Clearance
- Public Trust background check
- Full Stack Web Developer certificate
